What this seminar is about?

- Modern Sofware consists out many software components

What this seminar is about?

- Modern Sofware consists out many software components
- This software components can contain easyily contain about 100.000 lines of code
  - e.g. OpenSSL has about 230000 LOC
  - the linux kernel even has about 21 million LOC

What this seminar is about?

- Modern Sofware consists out many software components
- This software components can contain easyily contain about 100.000 lines of code
  - e.g. OpenSSL has about 230000 LOC
  - the linux kernel even has about 21 million LOC

- Is this secure?

Apple Goto Fail

```
...
if ((err = ReadyHash(&SSLHashSHA1, &hashCtx)) != 0)
    goto fail;
if ((err = SSLHashSHA1.update(&hashCtx, &clientRandom)) != 0)
    goto fail;
if ((err = SSLHashSHA1.update(&hashCtx, &serverRandom)) != 0)
    goto fail;
if ((err = SSLHashSHA1.update(&hashCtx, &signedParams)) != 0)
    goto fail;
    goto fail;
if ((err = SSLHashSHA1.final(&hashCtx, &hashOut)) != 0)
    goto fail;

err = sslRawVerify(ctx,
                   ctx->peerPubKey,
                   dataToSign,            /* plaintext */
                   dataToSignLen,         /* plaintext length */
                   signature,
                   signatureLen);
```

Do you remember other *accidents*?

Software Analysis Techniques

An overview of automated software analysis techniques:

- ▶ Static code analysis
    - ▶ Dataflow analysis
    - ▶ Abstract interpretation
    - ▶ RegEx search for secret values
- ▶ Dynamic code analysis
    - ▶ Code Sanitizer (z.B. AddressSanitizer von Clang)
    - ▶ Fuzzing
    - ▶ Symbolic Execution
    - ▶ Binary Instrumentation

Course Organization

We will organize the seminar like a scientific conference. You will present your research in written and in a presentation to your peers.

The paper you will be writing will (most likely) be a *Systematization of Knowledge (SoK)* or *introductory* paper.

SoK papers do not propose a novel approach. They take a broader view on a topic, explain the core concepts and put the most relevant works in context.
Introductory papers explain the core concepts of a field, the problems they are applied to and ongoing research directions.

Course Organization

- ▶ Research & Paper Writing
  - – Write a scientific paper of (exactly) 10 pages (excluding references and appendices)
  - – We will use the standard Usenix Security LaTeX template
- ▶ Review Phase
  - – Every participant creates 2-3 reviews of her/his peers
  - – ~1 page/review
- ▶ "Camera Ready" Phase
  - – Integrate the reviewers' remarks, improve your paper as far as possible
  - – Submit the "camera ready" version (final polished version)
- ▶ Presentation
  - – 30 minutes presentation
  - – 15 minutes discussion
- ▶ Language: English

TIΠ   Fraunhofer
AISEC

Time Table (Draft!!!)

Today	Premeeting
28.02.2022	Start of topic assignments
26.04.2022	Session: How to write a research paper?
02.05.2022-06.05.2022	Individual Meeting: Literature Research and Outline
09.05.2022	Graceful drop out deadline
06.06.2022-10.06.2022	Individual Meeting: First Paper Version (outline fixed and 80% content)
27.06.2022	Submit your draft for review
11.07.2022	Submit Reviews
24.07.2022	Submit "camera-ready" version
28.07.+29.07.2022	**Meeting**: Presentations and discussion

Requirements

"First version" <u>Structure & main contents</u> of the paper are fix. Introduction, conclusion, abstract might not be fully finished. Language does not have to be perfect, graphics might not be finished, some references might be missing. Focus on the "meat" of the paper!

"Draft " Paper should be mostly finished apart from small details.

"Review" Provide *constructive* feedback on your fellows' papers.

"Camera Ready" The *perfect* and final version of your paper that <u>you and your reviewers</u> will be happy with. Correct formatting, correct citations, no typos.

Grading

The grading is composed of *mandatory* and *graded* parts:

Mandatory:
1. Timely submission of paper, reviews, final paper
2. Meetings with advisor
3. Reviews

Graded:
1. Paper (50%)
2. Experiments (10%)
3. Presentation + Discussion (30% + 10%)

Location

- To be honest: We do not know yet, because of Covid-19
  - If onsite teaching is possible, in a room at TUM or Fraunhofer AISEC
  - Otherwise: Online via BBB

Registration

- Registration using the matching system
- *Register for this seminar until 15.02.2022.*
